

May 9, 2024

Our speaker will be Marty Cetron a fellow Country Squires Member who will present “Pandemics Syndemics and Permademics: Are We Ready?” his experiences and the CDC’s responses to the past three public health crises.

Marty is an MD with a specialization in infectious disease, epidemiology and tropical medicine – an expertise he honed in India and Africa. Marty and his wife, Maya, became full time residents in Eastman following his retirement after 20 years as the Director of Global Migration and Quarantine for the Centers for Disease Control. Marty holds a BA in Biochemistry from Dartmouth and an MD from Tufts. At the CDC, he played a key role in the country’s response to the H1N1 flu, Ebola and, of course, covid outbreaks.
