Prior meeting's minutes were approved.

A very nice lunch was served prior to our featured speaker

Dave Wood introduced our featured speaker and member Elof Erickson, former chief of

Plastic Surgery at Brigham and Women's Hospital.

Dr. Erickson's subject was the medical procedure of face transplants. This highly specialized

medical procedure has become more common in recent years for victims of severe

facial trauma. Trauma can be caused by a number of factors that result in disfigurement including

burns or accidents. The procedure can involve multiple operations to rebuild facial features and muscular

and bone structure. Nerve and vascular reconnecting is part of the operational process which is highly

complicated and requires three teams of surgeons in the process. Dr. Erickson made a masterful

presentation on this highly specialized branch of Plastic Surgery. The membership greatly appreciated

his presentation.

The speaker at our next meeting on February 13<sup>th</sup> is Steve Allenby on the subject of the Kearsarge Neighborhood Partners.
